PERSONAL STATEMENT

As an enthusiastic Software Engineer, I am keen to join your organisation and demonstrate many of the core skills I have acquired during my time at the University of the Witwatersrand and at my current employer Entelect. After discovering my passion for gaming and programming in high school, I couldn't get enough. I've made quite a few games and websites as projects as well as for work and I'm looking forward to bringing that passion into a full-time job.

KEY PERSONAL ATTRIBUTES

- **Team player:** Confidently contribute, share ideas and help others in a collaborative teamwork environment.
- **Time management:** Manage my working day effectively to ensure I complete my assigned work on time.
- **Multicultural awareness:** Ability to develop sound working relationships with individuals from various cultural and socioeconomic backgrounds.
- **Aptitude for new technology:** Can confidently learn and adapt to various technical/technology-based solutions which may include laptops, desktops, mobile devices and associated software applications running on these platforms.
- **Communication:** Assertive communicator who can present innovative ideas creatively, to different audiences.

ACADEMIC QUALIFICATIONS

University of Witwatersrand	BEngSc (in Digital Arts)	Completed in 2018
Maragon Private School Ruimsig	Matric	Completed in 2014

Subjects Studied in University:

<ul style="list-style-type: none">▪ Game Design▪ Software Development▪ Engineering Mathematics▪ Signals and Systems	<ul style="list-style-type: none">▪ Microprocessors▪ Data Structures and Algorithms▪ World Wide Web as a Creative Medium
--	--

ACADEMIC ACHIEVEMENTS

- Top 15% of students and Golden Key member at the end of first year

EMPLOYMENT HISTORY

Institute	Position	Duration
Entelect	Software Engineer	12/2020 – Present

I joined Entelect at the start of 2021 for corporate project exposure. My focus was on full stack development but initially I was assigned to a bank as a mobile developer. I started work originally as an android developer on the banks business banking mobile application using Backbase. The bulk of the work was on the iOS side and this resulted in me pivoting and learning swift.

- **Development:** Learnt how to develop and integrate APIs in android using Kotlin as well as started learning Swift for iOS.
- **Amazon Web Services:** Completed AWS Certified Cloud Practitioner Certification.
- **Backbase:** Completed backbase training and started development on android and iOS.
- **Project Management:** Learnt how to manage sprints and tasks using Jira and Confluence.
- **Interpersonal Skills:** Learnt how to communicate with clarity and diplomacy in a larger team.

Institute	Position	Duration
Dynex.IT	Software Engineer	10/2018 – 12/2020

During my final year of study (4th year) I started working as a software engineer at Dynex.IT. My focus is mainly on front-end development as well as integration of back-end systems with the front-end. Dabbled in API design and deployment.

- **Front-End Development:** Developed and deployed company website. Assisted in the developing of company products including mobile applications.
- **Project Management:** Learnt how to communicate and manage various projects among team members. Used agile boards and sprints to achieve efficient work flow.
- **Mobile Applications:** Learnt how to develop and deploy mobile applications in both Ionic and Flutter. Focused primarily on the front-end development.
- **Integration:** Learnt how to fetch data using a REST API and provide a meaningful presentation of the data.
- **Design Integration:** Learnt how to work in collaboration with a designer in order to create and communicate meaningful information on a mobile application.
- **Deployment (CI/CD):** Learnt how to automate application deployment from GitHub to the google play store.
- **Google APIs:** Using and integrating multiple google APIs such as maps and places autocomplete into a mobile application.

Institute	Position	Duration
Kopano.ai	Software Engineering Intern	04/2018 – 10-2018

During my final year of study (4th year) I was working as a software engineering intern. My focus was on front-end development in React, HTML and CSS. I collaborate in a team focused environment providing solutions and design to diverse industry clients.

- **Front-End Development:** Developed and deployed company website. Assisted in the development of company products for various consumers.
- **Communication:** Learnt how to communicate effectively and efficiently within a team setting. This was a good way for me to articulate my understanding and skills in a successful manner.
- **UI Enhancement:** Understand and improve various front-end components and ensure the customer is satisfied with the final product.
- **Collaborative Development:** I was able to pick up and learn new ways of development in a collaborative team setting. This helped me understand that the opportunities and risks are more manageable and transparent.

SOFTWARE DEVELOPMENT & PROGRAMMING

Android Studio (IDE), IntelliJ (IDE), Java, Assembly, SQL, C++, C#, Javascript, jQuery, HTML, CSS3, React, Ionic, PHP, Flutter, Dart, NodeJS, Express.js, Handlebars.js.

HARDWARE & SOFTWARE SKILLS

- Microsoft Windows XP/7/8/10.
- Microsoft Office.
- MacOS (Unix).
- Unity.
- Android, Flutter, Ionic.
- Desktops, Laptops, Smartphones and Tablets (iOS/Android).

OTHER INFORMATION

- During my spare time I enjoy playing squash, gaming and socialising with friends. I also go to the gym regularly.
